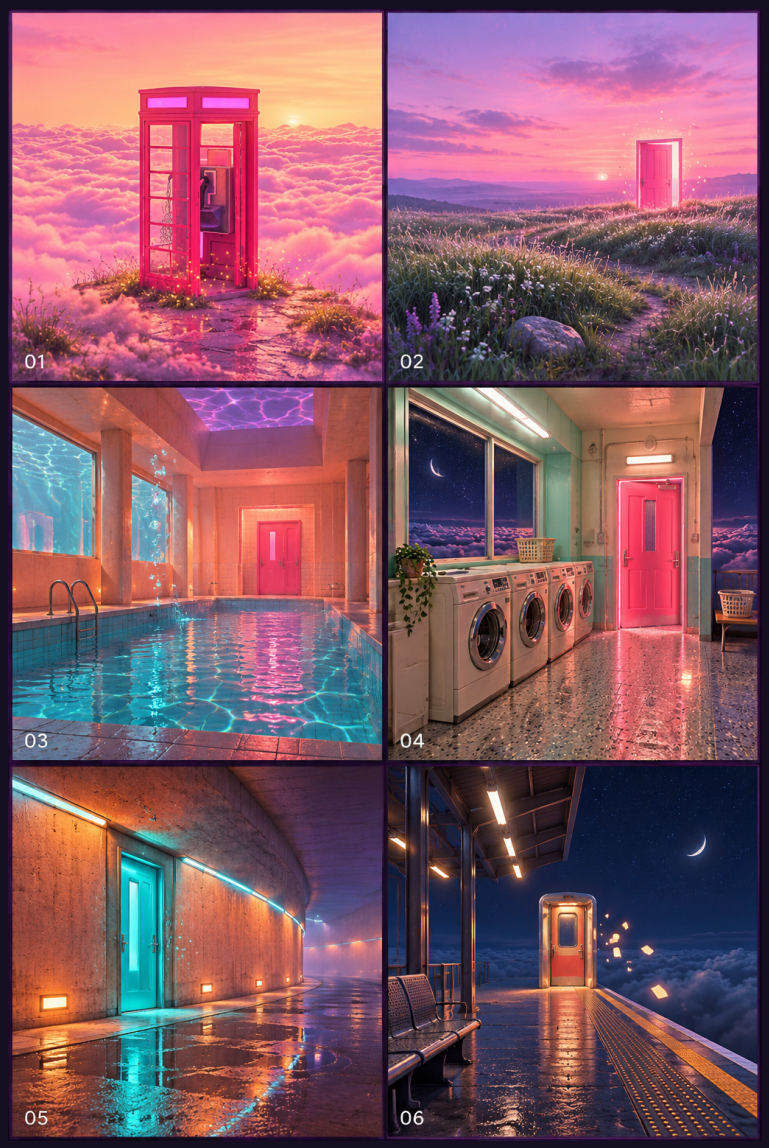
A WORLD OF THRESHOLDS

Liminal Doors

37 places. Random discoveries. One remembered way back.



A quiet, vivid collection for PC VRChat: distant doors, strange textures, intimate interactions and a unique hidden prismatic animal in every place.

Draft 01 / Environment art, floor register and production direction. AI concept renders are not Unity screenshots. Floors 34, 35 and 37 were removed on 2026-10-19.

CREATIVE RULES

Leave room for wonder

Sparse spaces, deliberate color and one memorable behavior per destination.

The door is the event

Keep the architecture simple enough that the threshold feels special. Use a localized particle signature, an inviting sound and a clear passage. Some doors are visible from far away; others reward a small search.

Random forward, reliable back

A forward door chooses a destination while avoiding recent repeats. Its arrival door remembers the actual room you came from. The opening booth remains the fixed beginning. A return route must survive later random choices.

Every floor has an animal

Use one unique species per floor as its organizational name. Hide it naturally, at a scale that suits the room: a tiny animal on a bench can be as memorable as a larger sculpture. All share the prismatic material language.

A restrained kind of neon

Use one or two saturated accents against a calm base. Let texture, reflection, haze and a single moving detail carry the scene. Keep fairy lights separate from the door's particle cue.

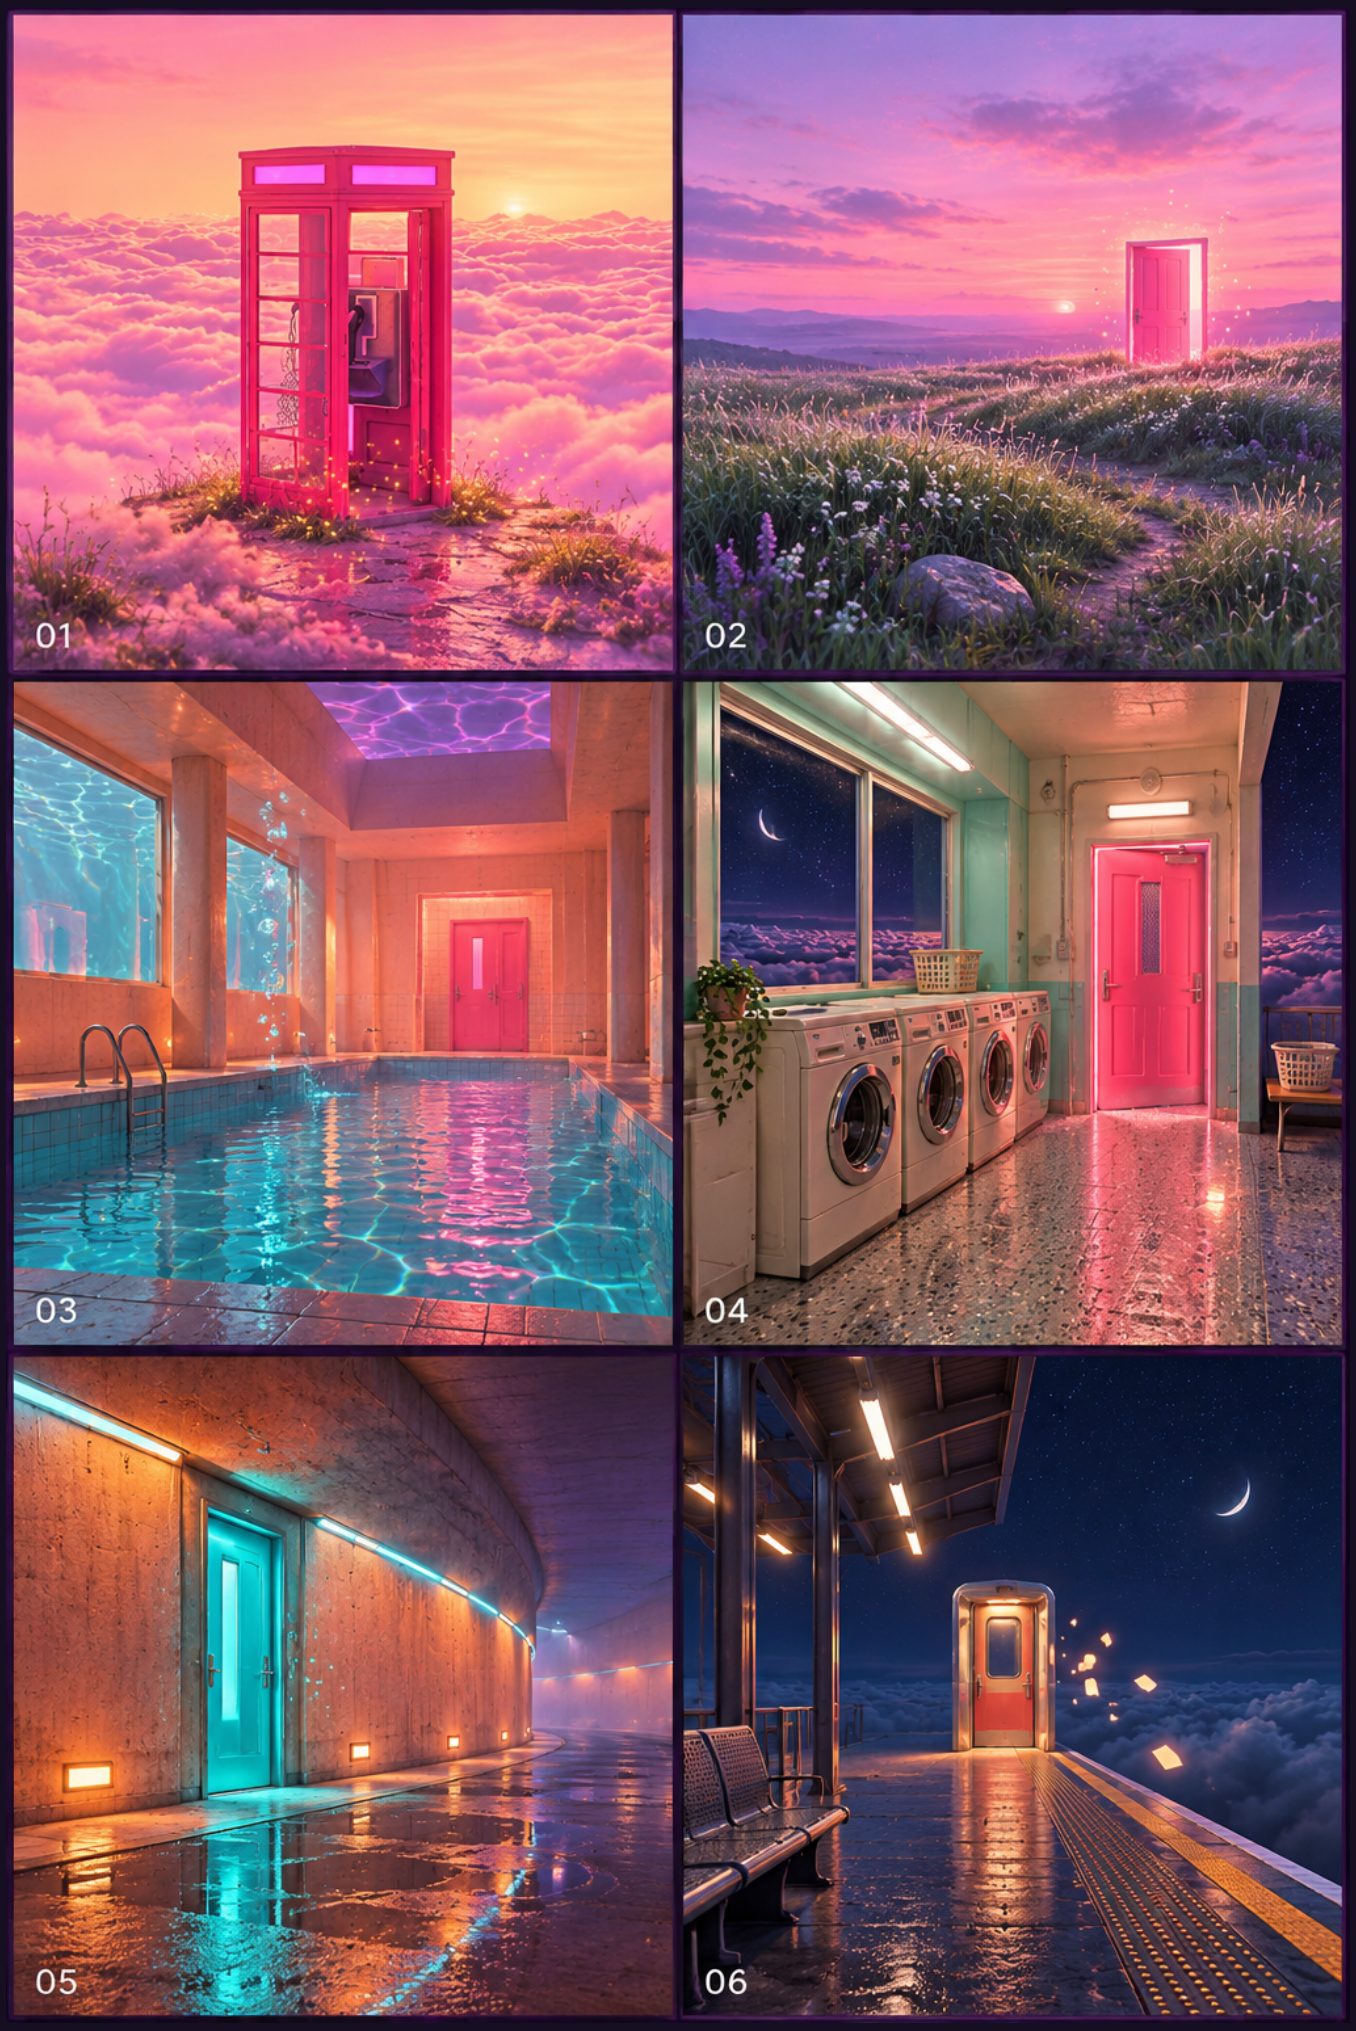
A draft with room to evolve

The following plates preserve the concepts already liked. Hidden animals, the exact prismatic finish and later ideas are described in the notes; they are not yet present in every render.

COLLECTION 01 / SCENES 01-06

Places to discover

Read the panel numbers left to right, then top to bottom.



The animals and their places

Species names are unique. Hiding places and interactions are design proposals.

01 Fox — Pink Booth

hot pink / apricot / butter yellow / The exact booth from Astra's Infinite Pole, alone above a sea of pink clouds.

Door: Enter the booth through a fine drift of gold light. **Feature:** Soft cloud movement and a quiet telephone interaction. Reuse the original project asset; the image is a concept.

Hidden animal: A small fox curled behind the booth base.

02 Hare — Faraway Field

silver green / rose / lavender / Long grass and a distant horizon, guided by the supplied grass-and-sky world.

Door: A rose door just beyond the rise, with rising motes. **Feature:** Wind moves in broad bands across the field. Exact reference matching is pending.

Hidden animal: A hare tucked into the grass beside a flat stone.

03 Axolotl — Pool After Closing

aqua / peach / ultraviolet / An empty tiled pool hall with generous quiet space.

Door: A pink door waits in a dry recess beyond the water. **Feature:** Slow caustics and sparse bubbles; a shallow walkable pool edge.

Hidden animal: An axolotl on a submerged tile ledge.

04 Raccoon — Last Laundrette

mint / ivory / midnight blue / A few enamel washers in a small, vacant laundrette.

Door: A hot-pink service door sheds glowing lint. **Feature:** One washer contains a slowly turning sky.

Hidden animal: A raccoon behind the last laundry basket.

05 Gecko — Apricot Underpass

apricot / lilac / electric cyan / A plain concrete passage bends out of sight.

Door: A cyan threshold forms a crisp reflection in the puddles. **Feature:** Thin light strips and damp, textured concrete.

Hidden animal: A tiny gecko on the shaded side of a column.

06 Crane — Platform Between Trains

midnight blue / coral / silver / An empty platform suspended above clouds.

Door: A lone train door opens without a train; ticket fragments hover nearby. **Feature:** A distant arrival tone, then silence.

Hidden animal: A crane behind the far platform sign.

COLLECTION 02 / SCENES 07-12

Places to discover

Read the panel numbers left to right, then top to bottom.

The animals and their places

Species names are unique. Hiding places and interactions are design proposals.

07 Moth — Velvet Waiting Room

wine / dusty rose / acid yellow / Low seats and an oversized expanse of soft carpet.

Door: A yellow door surrounded by nearly still luminous dust. **Feature:** Fabric pile catches the light as you move.

Hidden animal: A moth on the back of the smallest chair.

08 Frog — Rain That Misses You

charcoal / cyan / magenta / Rain falls into an open stone courtyard.

Door: The rain bends around a magenta frame, leaving a dry rectangular gap. **Feature:** A small dry route crosses wet reflective paving.

Hidden animal: A frog under the lip of a low stone bench.

09 Hummingbird — Upside-Down Conservatory

seafoam / violet / pearl / Planters and vines hang overhead in an empty glass room.

Door: A violet door hides behind frosted glazing and upward pollen. **Feature:** Optional gentle low gravity in one marked area.

Hidden animal: A hummingbird among the overhead leaves.

10 Ibex — Salt Moon

chalk white / petrol blue / neon pink / A cracked salt plain beneath an enormous moon.

Door: A small pink door, with salt grains circling its handle. **Feature:** Distance comes from haze and a simple horizon.

Hidden animal: An ibex behind a knee-high salt ridge.

11 Cat — Motel Without Rooms

peach / turquoise / cherry red / A weathered motel balcony overlooking empty sky.

Door: One cherry-red room door releases a few red sparks. **Feature:** A flickering vacancy light and warm stucco texture.

Hidden animal: A sleeping cat under a balcony chair.

12 Manta Ray — Tidal Carpet

lavender / peach / deep teal / A sunken lounge whose carpet appears to roll like the sea.

Door: A peach door peeks above a low wall; droplets hang in place. **Feature:** Only the surface pattern moves; the floor stays stable.

Hidden animal: A manta ray beneath a glass-topped side table.

Places to discover

Read the panel numbers left to right, then top to bottom.

The animals and their places

Species names are unique. Hiding places and interactions are design proposals.

13 Hedgehog — Vending Machine Clearing

cobalt / pale green / watermelon / One vending machine in a small twilight clearing.

Door: Its rear panel is a walk-through door with rising bubbles. **Feature:** A single illuminated selection changes the machine's hum.

Hidden animal: A hedgehog beside the machine's rear foot.

14 Lynx — Lavender Quarry

lilac / chalk / acid lime / Broad terraces of pale chalk and clean-cut stone.

Door: A lime door is set into one smooth rock face. **Feature:** Fine dust rises instead of falling.

Hidden animal: A lynx in a shallow terrace recess.

15 Seahorse — Empty Aquarium

deep teal / violet / gold / A quiet aquarium corridor with dark, seemingly vacant tanks.

Door: A gold door stands in an accessible drained exhibit. **Feature:** A few fish-shaped lights appear, then dissolve.

Hidden animal: A seahorse behind a small exhibit plaque.

16 Heron — Blackwater Footbridge

black plum / weathered gray / icy blue / A narrow boardwalk crosses perfectly still dark water.

Door: A pink door draws blue lights upward from the surface. **Feature:** Subtle timber creaks and one restrained reflection.

Hidden animal: A heron on a low pile beside the bridge.

17 Dragonfly — Soft Staircase

cream / tangerine / fuchsia / A soft, broad staircase rises into a cloud sky.

Door: A door waits at the upper landing, traced by luminous dust. **Feature:** Next render: a spiral staircase based on Astra's Infinite Pole.

Hidden animal: A dragonfly resting beneath the handrail curve.

18 Snow Leopard — Snow in the Lobby

glacier blue / pale pink / amber / An empty hotel lobby with a curved reception desk.

Door: An amber door creates a halo where the snow stops. **Feature:** Very fine indoor snowfall with a low particle count.

Hidden animal: A snow leopard behind the reception return.

Places to discover

Read the panel numbers left to right, then top to bottom.

The animals and their places

Species names are unique. Hiding places and interactions are design proposals.

19 Raven — Pearl Car Park

pearl / petrol green / magenta / A vacant parking level with numbered pillars and oily puddles.

Door: A magenta stairwell door is hidden behind the final pillar. **Feature:** An occasional fluorescent buzz punctuates the stillness.

Hidden animal: A raven on the back edge of a low barrier.

20 Octopus — Room Beneath the Ocean

ultramarine / coral / pale plaster / A dry room beneath a transparent water ceiling.

Door: A coral door gathers droplets that drift upward. **Feature:** Slow overhead ripples and restrained light shafts.

Hidden animal: An octopus clinging beneath a corner shelf.

21 Deer — Wind Telephone

silver green / violet / orange / A disconnected telephone rests on a small grassy hill.

Door: An orange door catches thin luminous filaments in the wind. **Feature:** A soft listening interaction with no required conversation.

Hidden animal: A deer behind the hill's lone stone marker.

22 Firefly — Sleeping Arcade

indigo / raspberry / cyan / Four silent arcade cabinets in an otherwise empty room.

Door: A raspberry maintenance door changes square pixels into round motes. **Feature:** Cabinet screens show slow abstract landscapes.

Hidden animal: A tiny firefly on a joystick housing.

23 Kangaroo — Low-Gravity Court

lavender / navy / tennis yellow / An empty sports court where one ball pauses mid-bounce.

Door: A pale door replaces part of the fence; chalk dust orbits it. **Feature:** An optional low-gravity zone with an obvious exit.

Hidden animal: A kangaroo behind the low equipment bench.

24 Scarab — Ribbon Dunes

coral / pale gold / electric blue / Combed sand ridges and a simple winding path.

Door: A blue door sits in a sheltered hollow with a fine sand spiral. **Feature:** A faint moving ribbon of light follows the route.

Hidden animal: A scarab beside a ripple at the dune's shaded base.

COLLECTION 05 / SCENES 25-30

Places to discover

Read the panel numbers left to right, then top to bottom.

The animals and their places

Species names are unique. Hiding places and interactions are design proposals.

25 Praying Mantis — Frosted Office

smoke gray / mint / violet / Nearly empty office partitions and one abandoned chair.

Door: A violet silhouette appears through frosted glass. **Feature:** Particles trace the door edge as you approach.

Hidden animal: A mantis on the reverse of a partition bracket.

26 Flamingo — Red Sun Reservoir

terracotta / dark teal / red / A dry causeway crosses a shallow concrete reservoir.

Door: A pink maintenance door is reflected beneath a low red sun. **Feature:** Slow luminous rings travel across the water.

Hidden animal: A flamingo behind the low overflow wall.

27 Jellyfish — Room of Curtains

dusty pink / cobalt / warm white / Tall woven curtains divide a vast, sparse room.

Door: One gently lifted curtain reveals the door and glowing loose threads. **Feature:** Quiet fabric movement leaves the route readable.

Hidden animal: A jellyfish nested inside a fold near the floor.

28 Butterfly — Glass Orchard

smoky lilac / rose gold / chartreuse / A few metallic trees carry translucent leaves.

Door: A rose glass door rests between the trunks. **Feature:** Nearby leaves briefly brighten when the door wakes.

Hidden animal: A butterfly on the underside of a low leaf.

29 Red Panda — Midnight Food Court

aubergine / peach / neon mint / Three closed counters and a handful of empty tables.

Door: A mint staff door is partly hidden, with tiny sugar-like motes. **Feature:** Rippled metal shutters and a soft refrigerator hum.

Hidden animal: A red panda behind a stack of trays.

30 Swan — Door at Sunrise

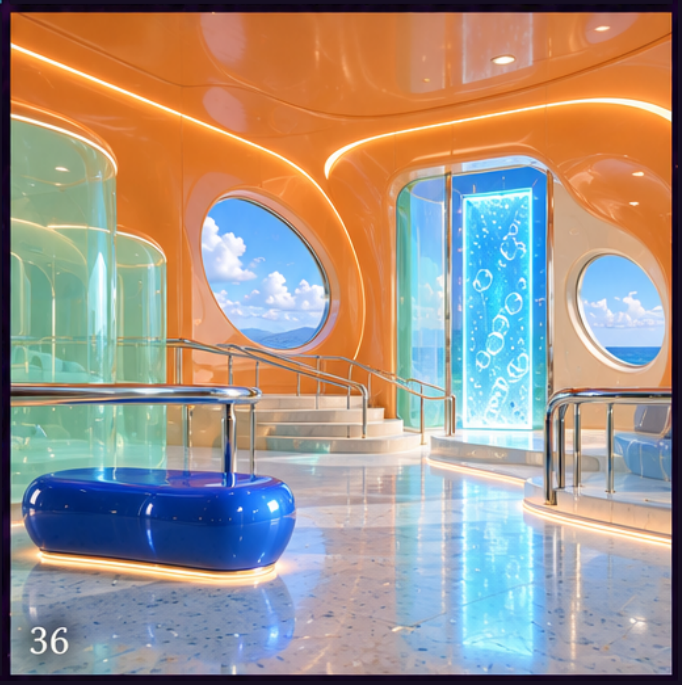
lavender / pale peach / hot pink / A long promenade opens into a quiet sunrise.

Door: A pink door carries faint particles in colors from the collection. **Feature:** A calm pause in the random route; it is not a mandatory ending.

Hidden animal: A swan behind the promenade's last low wall.

Places to discover

Read the panel numbers left to right, then top to bottom.



Panels 34 and 35 removed on 2026-10-19 (originality check).

The animals and their places

Species names are unique. Hiding places and interactions are design proposals.

31 Otter — Steam Between Stars

porcelain / pale aqua / violet / A warm bathtub in an open, star-filled bathing pavilion.

Door: Steam curls around a distant frosted pink door. **Feature:** Pick up, wet, squeeze and rinse a sponge; foam responds locally. Reference interaction still needs testing.

Hidden animal: A small otter under the folded towel on a dry ledge.

32 Sandpiper — Sunset Sandbar

tangerine / peach / lavender / A narrow sandbar takes an uncanny zigzag and S-curve through shallow water.

Door: A faraway sparkle door sits at the end of the sand itself. **Feature:** Wet sand, tide ripples and champagne sparkles; no boardwalk.

Hidden animal: A sandpiper beside a shallow tidal groove.

33 Dolphin — Aquaglass Concourse

white / turquoise / lime / An optimistic Aero hall with glass, sky and a shallow water channel.

Door: A turquoise door emits small glossy bubbles. **Feature:** A water-play station can host splash and squirt tools after reference inspection.

Hidden animal: A dolphin inside the low channel's quiet end.

34 and 35: removed on 2026-10-19, copied from other creators' VRChat worlds (originality check).

36 Kingfisher — Blue-Sky Terminal

orange / mint / chrome / cobalt / An empty organic 2000s terminal with oval sky windows and no grass.

Door: An azure glass door carries a few watery bubbles. **Feature:** Glossy molded walls, pale terrazzo and a single rounded bench.

Hidden animal: A kingfisher behind the bench's chrome support.

Make the magic predictable

A proposed behavior contract for the first playable prototype.

Door memory

Store the departure room and door, destination spawn and a visit identifier at each traversal. A return interaction uses that saved edge. Re-rolling the forward destination must never overwrite the edge needed to go back.

Travel together

Prototype a shared destination per forward door, with an explicit follow option for the group. A player who stays behind should keep a usable return path. Test split groups and late joiners before deciding the final multiplayer rule.

Small discoveries

Animal finds can be tracked as collectible discoveries. Keep them optional for ordinary travel. A gentle chime or small journal entry rewards the find without covering the scene in interface elements.

Sponge and water play

Prototype wet/dry state, pickup, squeeze, foam and rinse. Pool splashes and squirt tools can use localized effects and simple collision responses. Exact behavior and every ASMR tool still need hands-on reference inspection.

Gravity and comfort

Use gravity changes only in a few optional zones. Provide a stable route and an easy reset. Fade or mask room transitions, place arrival points safely inside the room, and keep moving effects away from the player's immediate view.

SCOPE AND PERFORMANCE

37 first. 333 over time.

A planning recommendation, not a measured room limit.

A meaningful number

333 can become nine chapters of 37 destinations. Repeated threes suit a mysterious recurring-door theme, and the chapter structure gives the project clear milestones. This is a creative choice, not a universal symbolic fact.

How many fit in one upload?

There is no reliable room-count answer without profiling the actual assets. Around 20-40 compact destinations is a reasonable first planning range if they share materials and only nearby content is active. Thirty-seven is a target to test, not a performance promise.

Activation is only part of the answer

Turning off unseen rooms can reduce rendering and component work. It does not by itself remove their textures and meshes from the world download or guarantee lower resident memory. Unique high-resolution textures, transparent layers and shaders can outweigh room count.

Build the budget from a vertical slice

Measure the booth, the bath, a reflective Aero room and a door transition on the target PC in VR. Check frame time, memory, download size, particles, transparent overdraw, lighting and multiplayer behavior. Expand in batches and repeat only when the content changes.

VRChat's public-world guidance recommends aiming below 200 MB and favoring baked lighting with few realtime lights. That is guidance, not a promise that a world below that size will run well. If 333 becomes the goal, multiple published chapters deserve serious consideration. Built-in persistence is scoped per world; cross-chapter progress needs a separate supported design.

NEXT VISUAL PASS

Ideas saved for later

These additions remain part of the active design brief.

Hidden prismatic animals everywhere

Give every hidden animal one angular prismatic look of our own in later concepts. Add each floor's species at its intended hiding place, with varied scale and pose.

Floating fairy lights

Use them in selected cozy rooms and gardens, with sparse, slow movement. Preserve the empty space and make the forward door's effect visually distinct.

The spiral staircase door

Reference the actual staircase in Astra's Infinite Pole. Update the Soft Staircase concept to a spiral route with an intentional door reveal and a comfortable walkable width.

Inspect every supplied world

The bathtub sponge, water toys, ASMR props, door mechanics, bubbles and remaining atmosphere references still require their own direct inspections.

What this draft establishes

Sources, completed work and the next acceptance checks.

Completed in this draft

Seven generated plates cover all 37 environment concepts. This book supplies 37 unique animal names, hiding proposals, door effects, interactions and palettes. Floors 34, 35 and 37 were removed on 2026-10-19.

Still to verify

Exact original booth placement and asset reuse; the full in-client reference tour; original model and shader sources; all ASMR props; animal model drag-and-drop in the editor; VRChat seating, performance and multiplayer behavior. The tools have passed the documented Unity checks. No room is declared built by this imagebook.
